We are the Key to your North Star™

Haedus Industries Capabilities

Haedus Industries is a pioneering consultancy and tech services firm that specializes in driving **innovation, agility,** and **digital transformation** for businesses and government agencies by providing **software, program management,** and **cloud-based** solutions.

Core Competencies

Program Management:

We provide program management and transform current PMOs into an agile, data-driven powerhouse, delivering cost savings, enhanced collaboration, and predictable programs.

Agile Transformation:

We drive organizations toward innovation and efficiency through Agile methodologies, equipping them with the tools and coaching needed for adaptability and success.

Software/Cloud-based Solutions:

We excel in agile software development, harnessing cutting-edge technologies like AI and blockchain for rapid, user-centric solutions that drive innovation and security.

Digital Transformation:

We lead the digital era by prioritizing customer-centricity, cybersecurity, and data-driven insights, enabling organizations to innovate, optimize, and deliver value with measurable results.

Differentiators

Holistic Approach: We integrate strategic consulting, Agile transformation, emerging technology enablement, and legacy systems modernization into a comprehensive service offering, providing a single source for diverse needs.

Agile Expertise: We are Agile evangelists with deep expertise in Agile methodologies, infusing agility into every aspect of an organization, fostering innovation, and adaptability.

Data-Driven Agility: We utilize data analytics for tangible results and measurable progress based on data insights.

Customization: Unlike larger competitors, we offer personalized solutions tailored to an organization's industry and unique challenges.

Empowerment: We do not just consult; we empower our clients to continue their journey independently, ensuring long-term success.

Past Performance

State of Maryland:

Cloud - Based Services/Software Solutions: We pioneered the revolutionary MD THINK programs, breaking silos, and data barriers between state agencies to deliver vital human services more efficiently and comprehensively to Marylanders through a cloud-based shared services platform.

Commercial

Legacy System Optimization: Assisted in optimizing legacy systems enhancing operational efficiency and performance.

Program Management: Enhanced program management, resulting in a 30% improvement in the delivery of new systems. Implemented project guidelines that led to a 20% reduction in administrative overhead.

Agile Transformation: Drove a successful Agile transformation, improving delivery timelines by 20% and increasing employee satisfaction by over 25% through tailored coaching and Scrum ceremonies.

Digital Transformation: Spearheaded an enterprise-wide digital transformation, improving program predictability from 59% to over 84%. Focused on fostering a culture of continuous improvement and establishing Lean Agile principles.
